SUMMARY

Detail-oriented Network Security Engineer and Law student at Helwan University, with a deep passion and self-taught expertise in network infrastructure and cybersecurity. Proficient in Cisco technologies, Fortinet FortiGate firewalls, and virtualized enterprise laboratory deployments. Experienced in hands-on traffic analysis and building secure system architectures. Eager to leverage technical skills in a professional network engineering environment.

PROFESSIONAL EXPERIENCE

CCNA Trainee

04/2026 – 06/2026

National Telecommunication Institute(NTI)

Giza-Egypt

- Configured and troubleshoot enterprise routing and switching protocols (OSPF, EIGRP, VLANs, STP, and EtherChannel) in simulated lab environments.
- Implemented core network services and security measures, including ACLs, NAT/PAT, IPv4/IPv6 addressing, and basic network hardening

Network Security Internship

07/2026 – 08/2026

National Telecommunication Institute (NTI)

Giza-egypt

- Configured and managed Fortinet FortiGate firewalls, implementing security policies, access control rules, and threat filtering to safeguard enterprise network traffic.
- Designed and simulated virtual network environments using Cisco technologies, evaluating routing protocols and network topologies.
- Monitored security logs, analyzed network traffic flows, and implemented hands-on threat mitigation strategies.

AWS Cloud Security Trainee

07/2026 – 12/2026

Digital Egypt Pioneers Initiative (DEPI)

Giza-Egypt

- Gaining hands-on expertise in securing AWS cloud infrastructure, identity management (IAM), and network security controls.
- Training on threat detection, vulnerability assessment, and risk remediation within cloud environments.

EDUCATION

Faculty of Law

09/2023 – 08/2027

Helwan University

cairo

SKILLS

Network Security

- Cisco Technologies, Routing & Switching, Network Topologies, ACLs, NAT.
- Network Security, Wireshark, Threat Filtering, Log Analysis, Security Monitoring, Network Troubleshooting&Incident Analysis

Firewalls

- Fortinet FortiGate, Firewall Configuration & Management, Security Policies, Access Control Rules.
- How To Access Fortigate.
- How Firewall Policies Work.

System Administration

- Windows Server, Active Directory, Ubuntu, Kali Linux.
- VMware Workstation Pro, VirtualBox, Virtualized Enterprise Laboratory Deployments.

Soft Skills

- Analytical Thinking, Team Collaboration, Communication, Technical Writing, Independent Learning, Problem-Solving Skills, Time Management

CERTIFICATES

- Network Security Certificate - NTI
View Certificate [↗](#)

PROJECTS

Network security

- Deployed and configured a **FortiGate NGFW**, establishing security zones, strict firewall policies, and application control to inspect and filter internal-to-external and east-west traffic.
- Implemented secure site-to-site and remote-access **IPsec and SSL VPN** tunnels to ensure encrypted corporate communication for remote users and branch offices.

windows server

- Deployed and configured **Active Directory Domain Services (AD DS)**, managing user accounts, security groups, and organizational units (OUs) to maintain a secure and scalable user structure.
- Implemented complex **Group Policy Objects (GPOs)** to enforce enterprise security standards, such as password complexity requirements, restricted administrative privileges, and automated desktop configurations.
